

Healthcare.Gaza Overview

Healthcare.Gaza is planned as a Decentralized Telemedicine & Resource Platform for Gaza Supporting life-saving healthcare access, transparency, and resilience in times of crisis.

The Problem

"Gaza is on the edge of catastrophe."

- Millions lack access to healthcare, medicine, clean water, and shelter.
 - Censorship & disinformation obstruct humanitarian coordination.
 - Blackouts disrupt critical communication between patients, providers, and the world.
-

The Solution

Healthcare.Gaza is a secure, uncensorable, decentralized healthcare platform.

- ✓ Remote telemedicine consultations
 - ✓ Centralized directory of doctors, resources, and protocols
 - ✓ Hosted on Web3 infrastructure
-

Core Features

- Encrypted Telemedicine: Consultations in Arabic and English
- Medical Resource Hub: Provider directories, protocols, medicine/supply alerts
- Uncensorable Web Access: No central server, always accessible
- Offline-First Mode: Syncs with local clinics during outages
- AI-Powered Agents: Triage, translation, scheduling, outreach
